Dear Ms. Salas,

As a resident of Premium Point Park on Echo Bay, which opens directly onto Long Island Sound, I strongly oppose the Broadwater liquefied natural gas facility for several reasons. We should not allow the introduction of commercial control of this beautiful part of our coastline, because it would be setting an unwise precedent for further infiltration of our environment. In addition, there would be added health and safety risks to our precious wildlife and local population. The current facilities for liquefied natural gas are adequate and do not interfere with normal life. Indeed, we should be focusing our minds on developing renewable, clean energy sources instead. I urge you to put your efforts into blocking the progress of the Broadwater project.

Please respond in writing.

Yours sincerely,

Sheila Ali-Oston B.Sc., M.Sc., F.R.I.
